

IN THE CLAIMS

Please amend the claims as follows:

1-3. (Cancelled).

4. (Currently Amended) ~~A system as claimed in claim 1, said system comprising~~ A system including an apparatus and a remote control for controlling said apparatus, the system comprising:

a speech processor for processing speech commands;

5 a microphone arranged on said remote control for enabling a user of said remote control to input said speech commands;

B1 a further microphone for enabling further users of the system to input speech commands; and

input designation means (209,215) for enabling the user to
10 operablyselectively designating designate which of said microphone (104) and/or said further microphone (170) is to be used as a signal source to said speech processor (211).

5. (Currently Amended) ~~A~~ The system as claimed in claim 4, ~~wherein said input designation means (209,215) being capable of controllingcontrols~~ the speech processor ~~(211)~~ to process speech ~~input commands~~ from said microphone ~~(104)~~ only.

6. (Currently Amended) A The system as claimed in claim 4,
wherein said input designation means (209,215) being capable of
controlling controls the speech processor (211) to process speech
input commands from said further microphone (107) only.

7. (Currently Amended) A The system as claimed in claim 4,
wherein said input designation means (209,215) being capable of
controlling controls the speech processor (211) to process speech
input commands from both said microphone (104) and said further

5 microphone (107), said microphone (104) having priority over said
further microphone (107).

8. (Currently Amended) A remote control (102) for use in a
system as claimed in claim 1a system including an apparatus and
said remote control for controlling said apparatus, the remote
control comprising:

5 _____ a microphone (104) for enabling a user of said remote
control to input speech commands for processing by a speech
processor (211), said remote control comprising; and

_____ input designation means for enabling the user operably to
selectively designate designating said microphone (104) and/or a
10 further microphone (107) as a signal source to said speech
processor.

9. (Currently Amended) An apparatus ~~(101)~~ for use in a system ~~as claimed in claim 1~~ including said apparatus and a remote control for controlling said apparatus, said remote control having a microphone for enabling a user to send speech commands to said

5 apparatus, said apparatus comprising:

_____ a speech processor ~~(211)~~ for processing speech commands, i

_____ a further microphone arranged on said apparatus for generating speech commands for said apparatus; and

_____ input designation means ~~(209, 215)~~ for enabling a user
10 operably designating to selectively designate which of said a
microphone ~~(104)~~ comprised by a remote control ~~(102)~~ of said
apparatus and/or and said further microphone ~~(107)~~ comprised by
said apparatus is to be used as a signal source to said speech
processor.

10. (Currently Amended) A method of controlling an apparatus ~~(101)~~, comprising ~~a step~~ the steps:

_____ transmitting speech commands to the apparatus from a microphone included in a remote control for controlling the

5 apparatus;

_____ transmitting further speech commands to the apparatus from a further microphone included in the apparatus;

selectively designating which of said speech commands and
said further speech commands are to be used as a speech input for
10 said apparatus; and
_____ of processing the selected speech commands for
B1 controlling said apparatus, ~~and a step of user operably designating~~
~~a microphone (104) comprised by a remote control of said apparatus~~
~~and/or a further microphone (107) comprised by said apparatus as a~~
15 ~~signal source to said speech processing.~~
